

# EPID-600 Introduction to Public Health

## Community Program Presentations

### Key Words:

General Assembly, Joint Committee, Primary Care, Health Systems, Medical & Dental Scholarships, Educational Outcomes, Practice 'sights', Policy Objectives. Indigent populations, 'Free' clinics. Voluntary care. Access. Under served populations. Targeted illnesses

### Concept

Government and private non profit agencies and organizations can stimulate new programs to meet the need of underserved populations.

### Objectives

Following these presentations, students should be able to describe state activities which focus on improving individual and community health status by improving access to primary care, as well as the functions of a 'free clinic'. They should be able to describe the role of the Virginia Health Commission, [an arm of the state legislature responsible for initiating studies to contain cost and improve access to health care]. As well as the Virginia Health Foundation [a private non-profit agency developed by the state legislature] which funnels foundation funds to community agencies which take a lead in improving access to primary care. They should be able to describe the role of 'Free Clinics' in improving access of health care and the value of their linkage to the community public health system. Also, read about one physician's view of the [California Doctor's experience](#) during riots of 1992 and what this might have meant to health access for the underserved in California.

### Presentations

**Health Care [Safety Net & Richmond](#) - ([Handouts](#)) Sheryl Garland MHA,** Also read [my comments](#) on the development of the programs. Sheryl refers to the IOM study "[Shared Destiny](#)". I have provided a link to [the book](#) which you can read on-line or purchase from the IOM Then scan development of the MCV-RCHD initiatives prior year's presentations;

[2002](#)

[2001](#)

[1998](#)

Finally scan "[Holes in Americas' Safety Net](#)" particularly pages 5-8

.

**[Virginia Health Care Foundation](#) ([handouts](#)): Jennifer Hoover**

Jennifer Hoover will show a video about activities of the VHCF, as well as discuss program and provide handouts on the efforts of the organization to improve access to primary care, particularly on rural and central city communities.

Look at;

Virginia's distribution of [free clinics](#)

Virginia's distribution of [primary care centers](#)  
[Compare them](#)

Other Foundation Models (Where is their focus?)

[Robert Wood Johnson Foundation](#)

[W. K. Kellogg Foundation](#)

[Ford Foundation](#)

[Bill & Melinda Gates Foundation](#)

[Henry J. Kaiser Family Foundation](#)

**[Joint Commission on Health Care](#)**: ([Print handouts](#)) **Kim Snead**

Look at the Joint Commission's [Decision Matrix](#) for the 2006 General Assembly Session:

How much is special interest and how much will address significant health issues affecting the whole population. How much is institutional based and affects ongoing medical interventions, How much addresses ambulatory care and prevention of institutionalization. Look at the options for each suggested intervention and decide where you stand. Next semester, when in Dr, Lanier's class, follow these activities and find out what happens and why. Visit the Joint Commission [Home Page](#) ,

Three articles from Carol Pugh are important to this evening's sessions as they are to Dr Lanier's presentation last week.

From the [Nov 16 New York Times](#)

[Link to](#) Annals of Internal Medicine Article on Physician willingness to support a National Health System.

[Link to](#) Editorial on above article in Annals of Internal Medicine.

Now: What other alternatives you could consider to ensure that all citizens have access to health & medical care. Should they be:

- Changes to the prepayment (insurance) system?
- Changes in organization for care? Mandated federally, or by state initiatives to ensure access by localities or groups of communities?
- What are some of the barriers to such integration of services
